# Guide to Install raw IPA(iOS) and APK(android) on physical device

This bundle contains a signed raw **dogcare.ipa** file with validity till 05-Aug-2023.

Note : In case of date expiry have to resign with valid Apple Developer or Apple Enterprise Account (https://developer.apple.com)

Using Xcode is the simplest way to install IPA file on physical device, if you have Xcode installed on your Mac please follow below steps:
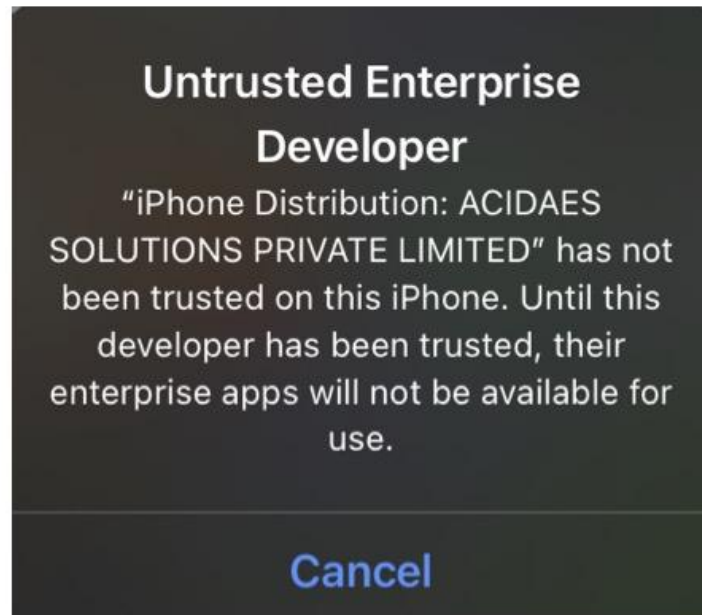

Xcode > cmd+shift+2 > devices > drag and drop or select "+" to add an IPA file.

Find more options to install IPA on device on this link :

https://medium.com/@itskaranzzz/how-to-install-ipa-file-directly-to-iphones-tabs-without-using-laptop-desktop-e645c36125d2

After success-full installation when click on app icon device will throw this alert :

Untrusted Enterprise Developer

"iPhone Distribution: ACIDAES SOLUTIONS PRIVATE LIMITED" has not been trusted on this iPhone. Until this developer has been trusted, their enterprise apps will not be available for use.

Cancel

Please go to Settings -> General -> VPN & Device Management -> Trust to use IPA on device.

How to install an APK on your Android device

You can install APK files on your Android smartphone or tablet directly from your browser.

Just open your browser, find the APK file you want to download, and tap it – you should then be able to see it downloading on the top bar of your device.

Once it's downloaded, open **Downloads**, tap on the APK file and tap **Yes** when prompted.

The app will begin installing on your device.

Thanks
